

HEPA FINANCE

THE END OF STANDARD YIELD FARMING

THE PROBLEM?

The Problem?

Problem

High inflation in other farm tokens.

Challenges

Even if members farm, they cannot make a net profit due to inflation.

Stake;
HEPA/BUSD
HEPA/BNB
HEPA/BANANA
HEPA/TAPE

Treasury

95% locked / 5% unlocked setup
The %95 will be locked until
00:00:00 UTC March 25th, 2022 and
it will then take a full year
(until **00:00:00 UTC March 25th, 2023**) to fully unlock them.

Withdrawals Penalty

For withdrawals we're using a slightly more complex system:

- 1% fee if a user withdraws under 5 days.
- 2% fee if a user withdraws under 3 days.
- 4% fee if a user withdraws under 24 hours.
- 8% fee if a user withdraws under 1 hour.
- 25% slashing fee if a user withdraws during the same block (in order to disincentivize the use of flash loans).

Liquidity

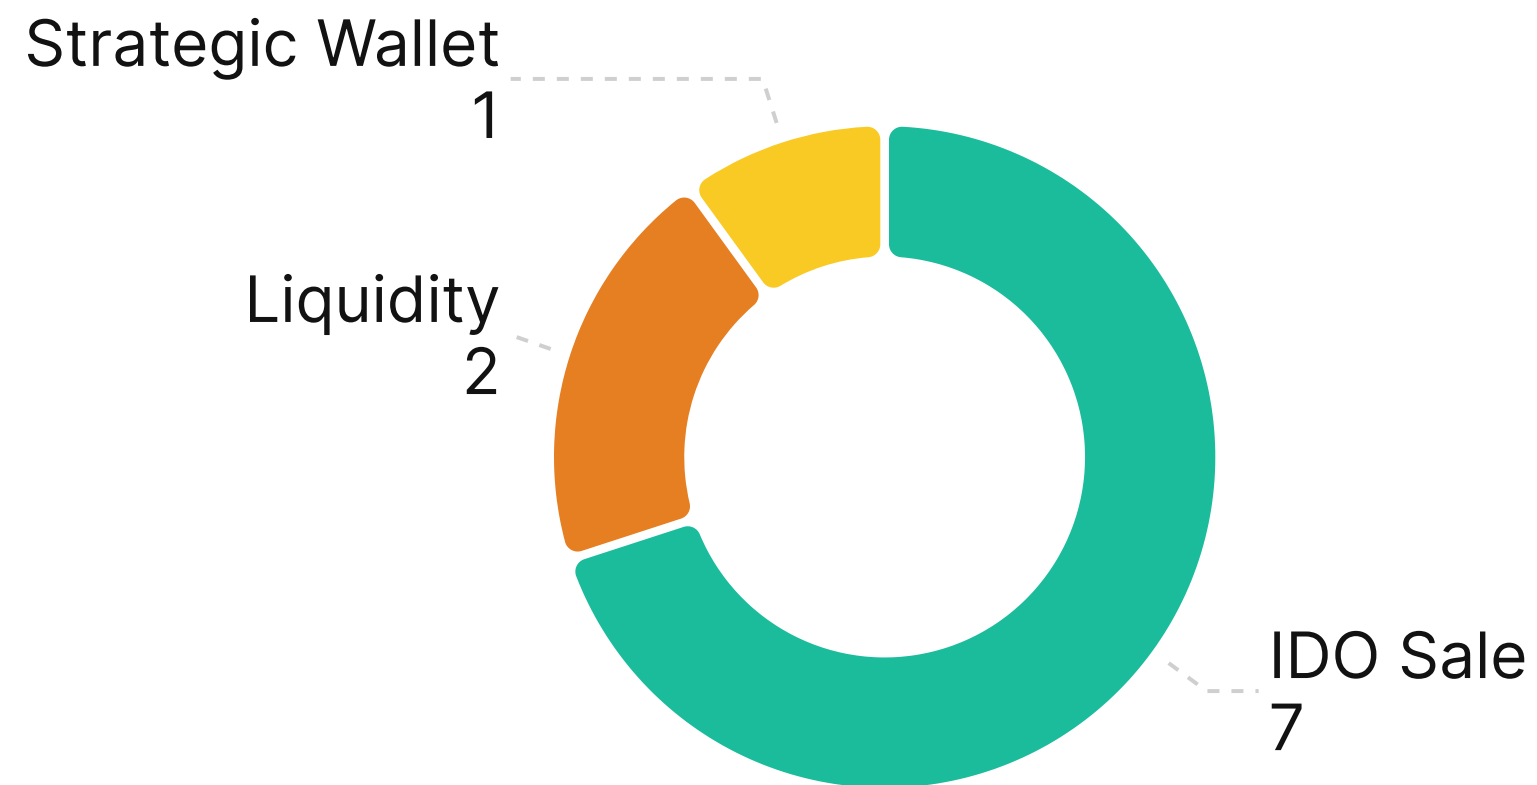

The founding team will commit ~\$10k worth of BNB to the HEPA/BNB pool to allow for users to easily swap to HEPA in order to enter the HEPA/BNB liquidity farm.

The HEPA/BNB pool on Hepa Finance will initially be seeded with a price of \$0.005 per HEPA.

ApeSwap router will be used for all transactions.

Liquidity will be locked on ApeSwap 1 Year

Tokenomics

- The HEPA token has a hard cap of **500,000,000 tokens**
- Hepa will reach hardcap March 2024. From start to finish **it'll take roughly 3 years in total to reach the cap.**
- The **10,000,000 HEPA** tokens will be distributed ***initial*** as follows:
 - **7,000,000 HEPA:** IDO Sale on ApeTools %10 Initial Unlock, %25 per month (4 months vesting)
 - **2,000,000 HEPA:** Allocated to the liquidity provider (LP) fund. The first action will be to seed initial liquidity for the HEPA/BNB pool.
 - **1,000,000 HEPA:** Allocated to the strategic wallet. (%10 initial open, %5 per month 2 year vesting)
